EDUCATION

Purdue University, Polytechnic Institute <i>Bachelor of Computer Information Technology, Data Analytics</i>	West Lafayette, IN Aug 2023 – Dec 2026
• Relevant Coursework: Applied Data Science, Applied Machine Learning, AI and Public Policy, Database Programming, Enterprise Data Management, Cybersecurity Fundamentals, System Analysis, Object-Oriented Programming.	

TECHNICAL SKILLS

Programming and Scripting: Python, SQL, Java, React
Cloud & DevOps: AWS (CloudWatch), GitHub, JIRA, Confluence
Data Tools & Visualization: Databricks, Tableau, Matplotlib, Hadoop, DuckDB, Salesforce, Mulesoft
Machine Learning: Transformers (Hugging Face), Tensorflow, Feature Engineering, NeuralProphet, Pandas, NumPy, Scikit-learn, XGBoost
Certifications: Microsoft Azure, Google Data Analytics & AI Agents, Databricks Fundamentals Accreditation

INDUSTRY EXPERIENCE

Cigna - Evernorth Services <i>AI Engineer Intern (Technology Early Career Development Program)</i>	May 2026 – Present
• Owned ML problem formulation and data infrastructure for an inbound fax forecasting system on Databricks, scaling data prep across 2M+ records (~300MB) to isolate a high-priority cohort of 21 status codes using a dual-volume ranking strategy. • Engineered multivariate feature pipelines (mapping volume tiers, business priority queues, and client routing) to aggregate raw events into structured daily/hourly training datasets (393K+ rows) optimized for NeuralProphet and LSTM experiments. • Shipped internal ML tooling using Streamlit and DuckDB to enable out-of-core exploratory data analysis and automated status-code profiling, reducing manual scoping effort and standardizing reproducible training slices.	
Amgen <i>Data Engineering Intern</i>	May 2025 – Aug 2025
• Built 5+ automated data pipelines with SQL and Python to process log data, reducing manual processing time by ~40% and eliminating recurring data errors per week. • Developed 3 Tableau dashboards for analytics, observability, and data quality, enabling real-time monitoring for a team of 15 stakeholders across 3 platforms. • Utilized AWS CloudWatch and Excel for prototyping and validation.	
Skima AI <i>Machine Learning Intern</i>	June 2024 – Aug 2024
• Designed and trained a multi-class Transformers pipeline on structured tabular data using Hugging Face, achieving 82% accuracy on an imbalanced real-world dataset of 50K+ records. • Applied geospatial feature engineering by integrating U.S. Census demographic data at the zip code level, improving model generalization by 7% over the baseline.	

RESEARCH & APPLIED AI INITIATIVES

Purdue Research Foundation <i>Innovate Insights Intern</i>	West Lafayette, IN Jan 2026 – Present
• Developed and deployed custom Microsoft AI agents to automate the generation of 150+ non-confidential patent summaries, leveraging prompt engineering and RAG to streamline intellectual property workflows.	
Co-Intelligence Lab - Purdue University <i>Research Assistant</i>	West Lafayette, IN Sept 2025 – Present
• Co-authoring a comprehensive literature review on smart home systems by synthesizing 100+ academic papers to identify critical gaps in Human-Computer Interaction. • Processed and labeled student-AI interaction data with Python and pandas to isolate distinct learning patterns and optimize downstream LLM tutoring model performance.	
Earn AI <i>Python, MCP, REST APIs, React, RAG</i>	Project
• Architected an end-to-end AI financial analysis platform, building a React.js frontend that communicates via scalable REST APIs to a custom Python backend, achieving sub-second natural language processing. • Engineered a Retrieval-Augmented Generation (RAG) pipeline utilizing the Model Context Protocol (MCP) to seamlessly link LLM inference engines with live financial data sources.	

LEADERSHIP & EXTRACURRICULARS

Engagement Director, Purdue Student Government | **Fundraising Chair**, Kahaani at Purdue (Raised \$30,000) | **Member**, Women In Cybersecurity Club | **Member**, Purdue Information Technology Professionals
